## PROJECTS

---

### Full Stack Blog App

*React, Node.js, Express, MongoDB, JWT, Material-UI*

2024

[Link](#)

- Developed a blogging platform enabling users to create, view, edit, and delete posts.
- Implemented authentication, allowing only authors to edit or delete their posts.
- Included title, summary, content (with a rich text editor), and an optional cover image uploaded via Cloudinary.
- Integrated voice-based search functionality using the react-speech-recognition library.
- Created a detailed post view displaying content, author details, creation date, and comments.
- Designed a responsive layout ensuring a seamless user experience across devices.
- Secured sensitive data using environment variables.

### Daily News App

*HTML, CSS, JavaScript, Bootstrap, Firebase, News API*

2023

[Link](#)

- Created a news application with HTML, CSS, JavaScript, and Bootstrap for frontend design.
- Developed a user dashboard allowing customization of news feed and preferences.
- Integrated Firebase Authentication for secure user account management.
- Implemented session management and user authentication for personalized access.
- Used Firebase Realtime Database for efficient data storage and retrieval.
